

EON718S

Powered 18-inch PA Subwoofer

OVERVIEW ■

The **JBL EON718S** 18-inch powered subwoofer, part of JBL's new EON700 Series of powered loudspeakers, brings pro-grade power and versatility to portable PA systems for live sound and installed applications, with class-leading volume and clarity and comprehensive features that make setup and operation a breeze.

The EON700 line, which includes the 10-inch EON710, the 12-inch EON712, the 15-inch EON715 powered PA speakers and the 18-inch EON718S subwoofer, delivers superior coverage and stunning fidelity out of the box, thanks to upgraded custom JBL drivers and horns. These systems are ideal for supporting any mid-sized indoor or outdoor event with loud, clear sound, powered by 1,300 (full-range speakers) or 1,500 (subwoofer) watts of clean, efficient amplification.

Built-in parametric EQ, polarity inversion and speaker delay bring even more versatility to this rugged, reliable subwoofer that's ideal for everyone from singer/songwriters and event DJs to corporate AV providers and houses of worship.

FEATURES ■

■ **Iconic Acoustics, Superior Sound**

The EON718S produces smooth, natural bass down to 31 Hz, thanks to a newly engineered acoustic package with a completely redesigned woofer and 1,500 watts of ultra-efficient amplification. Dial in your signature sound using the 718S' built-in parametric EQ, polarity inversion and speaker delay.

■ **Connectivity and Control**

Two Combo inputs and two XLR loop-outs for additional speakers allow a range of connectivity options. Access speaker functions via a backlit color EasyNav LCD screen.

■ **Configure Your Way**

The EON718S' built-in threaded pole mount expands configuration options, letting you tailor your system for music venues, corporate events or worship services. And because subs are stackable, they're easier to configure in cardioid applications and to store and transport.

■ **Rugged and Reliable**

Like every JBL speaker, the EON718S undergoes 100 hours of rigorous testing to ensure it will perform flawlessly and consistently in real-world conditions.

EON718S

Powered 18-inch PA Subwoofer
