

Hear the truth™

JBL® CINEMA SB 200

Plug-and-play, 60-watt soundbar with HARMAN Display Surround and *Bluetooth*® connectivity.

LEGENDARY SOUND SINCE 1946

THE ALL-IN-ONE
CINEMA SOUND
SOLUTION.

The JBL® Cinema SB 200 is a complete, integrated soundbar system that wirelessly streams music and dramatically improves the sound reproduction of televisions. The soundbar is a plug-and-play solution incorporating two 3-1/2-inch woofers, two 1-inch tweeters, electronics, amplifiers and a bass port in a single, stylish enclosure. Designed to complement flat panel televisions from 32 to 40 inches, the JBL Cinema SB 200 is ideal for people who want premium sound quality with impressive bass performance in a nonintrusive, easy-to-install solution. It features exclusive HARMAN Display Surround, built-in Dolby® Digital decoding, analog and optical digital audio inputs and a bass boost function, as well as *Bluetooth*® connectivity for wireless music streaming from almost any device.

Highlights

- Plug-and-play solution
- Central, powered soundbar speaker
- *Bluetooth* connectivity
- Analog and optical digital audio inputs
- Exclusive HARMAN Display Surround
- Dolby Digital decoding
- Bass boost
- Dual-position equalization
- Dual high-excursion woofers and bass port
- TV-remote “learning” capability

KEY FEATURES

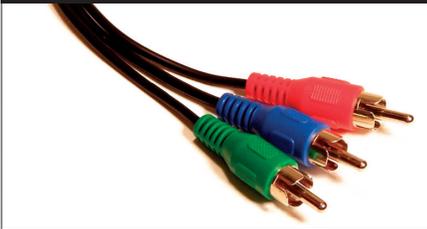

JBL® CINEMA SB 200

Hear the truth™

Movies, TV shows and music, anchored with powerful JBL bass. It's showtime.

Plug-and-play solution

The Cinema SB 200 easily connects to any TV with the included cables. Easy to install, the soundbar requires virtually no setup. Just connect and play.

Dual high-excursion woofers and bass port

The all-in-one Cinema SB 200 lets you enjoy great bass performance without having to find room for an external subwoofer. Its dual high-excursion drivers and bass port anchor movies, TV shows and streaming music with powerful JBL bass.

Bluetooth connectivity

Movies and TV shows aren't the only things that sound better with a JBL soundbar. The Cinema SB 200 wirelessly streams music from smartphones and tablets, delivering room-filling, full-range sound reproduction with exceptional bass.

Analog and optical digital audio inputs

The Cinema SB 200 features enough inputs to connect a TV and a disc player, satellite tuner or cable tuner to the system. It connects directly to any television and increases convenience – no plugging-in or unplugging required.

Exclusive HARMAN Display Surround

Drawing from HARMAN expertise in movie theater audio, the Cinema SB 200 lets you add cinema sound without adding multiple speakers. Employing proprietary HARMAN Display Surround technology, it creates a virtual surround-sound experience for multiple listeners from a single soundbar.

Dolby Digital decoding

The Cinema SB 200 decodes film soundtracks in their native format, which eliminates conversion stages that reduce sound quality. This helps the soundbar provide a superb surround-sound experience for multiple listeners.

Bass boost

JBL is known for exceptional bass response, and the Cinema SB 200 lets you increase low-frequency performance at the touch of a button on the included remote. The added bass impact is ideal for films.

Dual-position equalization

The Cinema SB 200 can either be placed on a shelf or tabletop, or wall-mounted with included hardware. A dual-position equalization feature optimizes the soundbar's performance for either placement, so you can position it where you choose without compromising sound quality.

TV-volume "learning" capability

The Cinema SB 200 comes with a credit-card-sized remote, but you might not need to use it much. That's because the SB 200 can "learn" the volume control IR code of your existing TV remote control, so you can control the soundbar and TV volume with the same remote.

SPECIFICATIONS

JBL® CINEMA SB 200

Hear the truth™

Some see a soundbar. JBL engineers see a powerful home entertainment experience.
